### **DETAILED ACTION**

Claims 152-154, 156, 158, 160, 167-169, 173, 175-177, 183-185, 189 are currently pending and are present for examination.

Applicants' amendments and arguments filed on 5-6-04, have been fully considered and ENTERED and are deemed to be persuasive to overcome the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. Specifically Examiner has withdrawn all previous rejections in view of cancellation of rejected claims.

### ***Drawings***

The drawings filed on 11-5-01 are acceptable subject to correction of either the figure description for figure 13 or correction to figure 13 itself. The informalities found are that the figure description for figure 13 and the figure 13 do not match with each other (Panels 13A-13C are not indicated on the figure). In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Color photographs and color drawings are acceptable only for examination purposes unless a petition filed under 37 CFR 1.84(a)(2) is granted permitting their use as acceptable drawings. In the event that applicant wishes to use the drawings currently on file as acceptable drawings, a petition must be filed for acceptance of the color photographs or color drawings as acceptable drawings. Any such petition must be accompanied by the appropriate fee set forth in 37 CFR 1.17(h), three sets of color drawings or color photographs, as appropriate, and, unless

already present, an amendment to include the following language as the first paragraph of the brief description of the drawings section of the specification:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings have been satisfied.

***Allowable Subject Matter***

Claims 152-154, 156, 158, 160, 167-169, 173, 175-177, 183-185, 189 are allowed.

The following is an examiner's statement of reasons for allowance: Following a diligent search it was determined that the prior art neither teaches nor suggests a variant cytochrome P450 oxygenase with the instant properties as claimed in above claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
